Your Vision. Our Code.

Profile

Full Stack Web Developer and founder of **Nexora Tech**, building secure, scalable software platforms — websites, e-commerce systems, management dashboards, and ERP solutions — for Ethiopian businesses. Combines hands-on engineering with UI/UX design sensibility to ship products that are fast, accessible, and genuinely useful. Comfortable owning a project end-to-end: architecture, backend, frontend, and the client conversation in between.

Experience

Founder & Lead Developer

2026 — Present

Nexora Tech

- Lead end-to-end development of websites, management systems, and custom software for Ethiopian businesses, from discovery through deployment.
- Architect scalable platforms spanning e-commerce, ERP, and internal dashboards built around real client workflows.
- Own client relationships directly — translating business requirements into technical specs and shipped features.

Full Stack Developer

2025 — 2026

Freelance / Contract Projects

- Delivered e-commerce platforms, booking systems, and backend APIs for clients across multiple industries.
- Built and integrated REST APIs, authentication systems, and relational database schemas from scratch.
- Managed full project lifecycles independently, from initial scoping to post-launch support.

Selected Projects

Bingo Bot Platform

Multiplayer Telegram bingo bot with ETB wallet & payments.

E-Commerce Search Engine

Search & recommendation engine using Trie and TF-IDF.

OS Synchronization Toolkit

C/C++ shell interfaces & load balancing tools.

Last-Mile Logistics Optimizer

Route optimization tool using Dijkstra & priority queues.

Education

Software Engineering Studies
